

PERKIOMEN VALLEY SCHOOL DISTRICT
School Health Services

Dear Parent/Guardian:

The Pennsylvania School Health Law requires a medical examination for children on original entry to school (i.e. Kindergarten or First grade), 6th grade and 11th grade.

A dental Examination is also required by Pennsylvania School Health Law for children on original entry to school (i.e. Kindergarten or First grade), 3rd grade and 7th grade.

We recommend that these examinations be completed by your child's physician and dentist since these professionals can best evaluate your child's health.

If you would like the physical and dental examinations to be performed by your family physician and family dentist at your own expense, please check the appropriate spaces below so that the school can provide you with the proper forms.

The physical examination **MUST BE DONE AFTER SEPTEMBER 1, 2014** and returned to the school nurse by the first week of school, otherwise your child will receive a physical examination by the school doctor.

The dental examination **MUST BE DONE AFTER SEPTEMBER 1, 2014** and returned to the school nurse by the first week of school, otherwise your child will receive a dental examination by the school dentist.

PLEASE INDICATE YOUR PREFERENCE:

_____ I will have my child's physical examination performed by our family physician. I understand if the form is not completed and returned by the first week of school, my child will have a physical examination performed by the school doctor.

_____ I request the school doctor perform the physical examination.

_____ I will have my child's dental examination performed by our family dentist. I understand if the form is not completed and returned by the first week of school, my child will have a dental examination performed by the school dentist.

_____ I request the school dentist perform the dental examination.

Child's name (please print)
